

Sat-Nav guided teaching

Teacher John Williams leads his class around the Woodland Discovery Trail. Since this is his first visit, he relies on the Q3 Ranger's advanced navigation capability to guide him round the trail.

The Q3 Ranger not only gives him directions, but it also tells him where to stop and what to look for at each of the activity points.

As John and his class follow the trail, he is provided with detailed environmental and safety information.

The Q3 Ranger also organizes and directs specific curriculum based activities for the young visitors. His pupils observe and explore woodland life, using Q3 Rangers to find out about their discoveries.

Although John is a teacher, the class could equally as well have been escorted by any approved parent or volunteer, so sophisticated is the level of support given by the Q3 Ranger.

It's good to know too, that their rugged build means they are designed for tough use with reliability built in.

Woodland
discovery trail
ready to run

Your own **w**oodland discovery trail™

Three easy steps and you're ready to run

1

Visit our demonstration trail at the award winning Woodland Education Centre, Honiton, Devon, for a detailed hands-on appraisal of the Q3 Ranger system in a practical environment. Discuss how the system could benefit you and the features you would like to incorporate in your trail. There is no charge for this visit.

2

Following your visit and at your request, our specialist will visit your site and survey the area of your intended trail. From this a detailed specification and quotation will be drawn up. If you are happy with our proposals you then place your order and relax whilst we produce your trail. There is normally a charge for this visit.

3

We deliver your programmed Q3 Rangers, set up and ready to run!

Deliver education automaticallywith your own woodland discovery trail

The Woodland Discovery Trail is a satellite-guided woodland experience using Q3 Rangers, which are rugged, hand-held computers. Schools and visitors are automatically guided around a trail, exploring and discovering woodland life along the way.

The Woodland Discovery Trail incorporates a number of information and activity points along the route. Our proven activity modules will ensure the success of your trail which will also include specific content tailored to your site.

Your Q3 Ranger trail enables you

to:

- Attract new audiences.
- Make better use of your site and staff resources.
- Provide a consistent and expert message.

"We'll definitely be back next year!"

"It's as cool as my Nintendo!"

"The Q3 Rangers were amazing"

"The Woodland Walk was ace"

Q3 Rangers

The Q3 Ranger System:

- A revolution in countryside and outdoor interpretation.
- Automatically guides and delivers captivating, expert content at predetermined outdoor points.
- Uses sounds, spoken word, images and movies.
- Hand-held, rugged, weatherproof, GPS-enabled computers, with easy to use touch screens.
- Add more trails and content at any time with our modular and expandable system.

Options

Extra activity points for your Woodland Discovery Trail. Additional Q3 Rangers.
